

Amr Salah

Skills

Data Base: PostgreSQL, SQL Server

Data Analysis: Python, Excel

Data Visualization: Power BI, Tableau

Experience

Check-in Counter Agent, EgyptAir – Cairo, Cairo airport Mar 2025 – Present

- Handling customer complaints about flight delays and cancellations
- Providing Assistance to customer needs during the check-in process
- Checked-out Passengers in a Seamless flow Ensuring they reach aircraft on time without issues with staff
- Collaborated with cross-functional teams to ensure compliance with aviation regulations and service standards, showcasing attention to detail and process optimization.

Business Developer, AEC – Cairo, Nasr City Jan 2023 – Present

- The manager wanted to know what happens in all his projects, So I started to assign people to make a daily report to all Projects and I documented it for him.
- doing research on new Technologies that can help Improve Business and fork to related fields like Project management tools, CRM systems, etc.
- Created an internal system to share data between different devices
- prepared marketing material to create social media pages to launch a marketing campaign in buildings

Project Engineer, Mercon Development – Cairo, 5th settlement Aug 2022 – Mar 2023

- We faced delays due to the lack of materials from suppliers, so I communicated with them by phone calls and Emails to solve this problem, and we achieved our goal within the time frame without any delay.
- Monitored Project Milestones by finding obstacles that prevent the project from continuing.
- Chosen to make Forecast plan with Scrutinizing Actual plan for the previous month.

Projects

US Bikeshare system data GitHub link

- Used Python (NumPy, pandas) to understand U.S bikeshare data Calculated statistics
- built an interactive environment where a user chooses the data and filters for a dataset to analyze.

Electric Vehicles (EVs) dataset GitHub link

- this Project was fully done using Excel tool, Identified trends and outliers in EVs sales over a time period.
- found that there is a correlation between the number of EVs and the number of charging stations installed.
- Created a dashboard with charts showing these correlations and a map chart to show the number of EVs sold per state as well.

MTA daily ridership GitHub link

- used Power BI to Pivot dataset into clean fact model
- Cleaned and used data for visualizations

Education

Higher Technological Institute (HTI) – BS in Civil Engineering August 2021
